

Moving Forward with High School Redesign is grounded in nine foundational principles:

- Mastery Learning
- Rigorous and Relevant Curriculum
- Personalization
- Flexible Learning Environments
- Educator Roles and Professional Development
- Meaningful Relationships
- Home and Community Involvement
- Assessment
- Welcoming, Caring, Respectful and Safe Learning Environment

These foundational principles are interconnected. While a school may choose to focus on one or two principles in any given year, it is likely that they will touch on other principles as well.
